Team Involvement in Demonstration

Roles and coordination

Project: Global Fuel Prices and Taxation Trends: A Comprehensive Analysis

Study period: 2020–2026 **Primary tool:** Tableau Public **Data source:** supplied global fuel-price CSV dataset

1. Purpose

This document provides a way to describe each participant's actual contribution and make the demonstration coherent. Fill in names and responsibilities truthfully.

2. Suggested role matrix

Role	Possible responsibility	Evidence to retain
Data preparation	Inspect fields and record data-quality checks	Preparation log
Visualization	Build and validate worksheets	Workbook and worksheet screenshots
Dashboard/story	Arrange views and captions	Published dashboard/story
Website	Present project description and links	Repository and website
Documentation	Compile report and references	Final PDF report
Presenter	Explain the workflow and results	Demo recording

3. Coordination

Agree on a shared definition of the study period, units, aggregations and ranking rules so that different sections do not contradict one another.

4. Contribution record

For every participant, record completed tasks and the associated artifact. Do not list a role merely because it appears in this template.

5. Demo handoff

Use a clear transition between dataset, workbook, story and website. The presenter should be able to explain each chart and answer why its measure and aggregation were chosen.

Prepared as a project-documentation draft. Replace illustrative wording with verified results, actual screenshots, and the student's own decisions before submission.
